Lester Snow
Executive Director, CALFED
1416 N. M. St.
Sacramento, CA 95814

Aug. 27,
1999

Dear Mr. Snow,

This letter is in response to the
revised CALFED plan.

I would like to urge you to em-
phasize water conservation above all
other options. It is foolhardy and
premature to build more dams +
diversions before we have even
begun to see the potential that
conservation + reclamation has
to offer.

I strongly oppose CALFED's existing

CPB

840(2)

plan to increase water storage in
the Central Valley by raising ~~the~~
dams + building new offstream
storage reservoirs.

Thank you.

Susan Stephenson
